# **JETS Journal of Engineering and Thermal Sciences**

## **Aims and Scope**

JETS publishes high-quality articles concerned with fundamental and applied aspects of thermal science and engineering. The journal is not limited to a specific aspect of thermal science and engineering science but is instead devoted to a wide range of subfields in the applied mathematics, material science modeling, theoretical and industrial applications of thermal science, mechanics of solids and structures, life sciences, physics, and experimental research. Moreover, articles of interdisciplinary nature and review articles are welcome.

**All published papers are peer reviewed and crosschecked by plagiarism detection tools.**
